COLEMAN WELCOMES VISITING CURLERS

CANADIANS WIN FOUR STRAIGHT --NOW 10 POINTS IN LEAGUE

Lethbridge Manager Throws Up Sponge in Monday's Game --Couldn't Take Defeat

Ordered Players From Ice--Coleman Scores Another Well-Merited Victory Over Highly-Touted Maple Leafs to Delight of Local Supporters.

Coleman gained two valuable points in their game against Lethbridge Maple Leafs at the arena on Monday evening. The game was marred in the third period when Leafs dumped a goal credited to Jenkins. As a result of the dispute Lethbridge walked off the ice and thereby lost all grounds on which they could have protested the game.

At the time of the dispute Leafs were a man short; Canadians were pressing around the Leafs' net. After several unsuccessful attempts to score, Jenkins glared his stick to the puck and shot for goal. The goal judge waited a moment before flashing the red light and when it did go on the referees blew their whistles and awarded a goal. Leafs protested, Coach Weinman ordering his team off the ice when the referees refused to change their decision. Manager Herman Thole of Lethbridge then took up the argument but the officials held to their decision.

By their win Canadians took over sole possession of fourth place in the league standing, stepping past Nelson who lost Monday evening to Trail 5-3. Alworth, Jemson, W. Fraser and Jenkins were the marksmen for Canadians, while Kaleta and Stewart scored for Leafs.

In fairness to the referees, they asked eight persons who were immediately behind the net when the disputed goal was scored. Seven of those eight persons stated a goal had been scored. To make their decision more reliable only non-residents of Coleman were asked their opinion. The Lethbridge players when asked their opinion of the game after having left the ice, admitted that Coleman deserved the two points since they (Lethbridge) had not gone back on the ice within the five-minute time limit.

Herman Thole stated he was proud of the protest he had made in the arena with the officials and that he would

Lethbridge Maple Leafs Manager Makes Childish Outburst

Apology is Demanded by President Gardner of Canadians.

The childish outburst of petulance by Herman Thole, manager of Lethbridge Maple Leafs, is on a par with something one might expect from the smallest of the smallest hick towns, instead of a city club manager such as Thole prides himself on being.

To blame Bill Johnston is the height of absurdity. Independent opinion and evidence of eye-witnesses who were back of the net state with any shade of doubt that it was a fairly scored goal, and this evidence was substantiated by spectators who were from points other than Coleman. Thole says if there is any criticism, he is the one to take the rap. There is only one sportsmanlike way to deal with a dispute. Play the game and make the protest to the proper quarter. Don't pull the team off the ice as if they were a bunch of kids instead of grown men. Hockey fans up and down the line will draw their own conclusions. Thole certainly hasn't put the Leafs in a favorable light by his outburst.

Canadians have been one of the strongest drawing teams for Lethbridge box office in recent years, so that Thole's action is not only unsportsmanlike, but most unbusinesslike in the bargain. To criticize Bill Johnston as a referee is just another of those alibis which are often seized on as an excuse for a lack of sportsmanship. He is doing a good job, and this is the first "kick" heard from any visiting club. "Blame the referee" is an easy way to make excuses for losing a game, but it will not go in this case.

Coleman Canadians have proved superior in playing ability in their last two games with Maple Leafs, and apparently it is a very sore spot. And there are plenty of backers here to spot the local boys for another win next time they meet Lethbridge. President Gardner of the Canadians is demanding a public apology to be published in the Lethbridge Herald, having placed the request in the hands of President Coats of the West Kootenay League. Mr. Thole will find that this "roughneck" attitude towards players, officials and the public who pay will not be tolerated.

COLEMAN ELKS VISITED MAC- LEOD LODGE WED. NIGHT

Headed by Exalted Ruler W. E. Read, of Coleman Lodge, and District Deputy Frank Barrington, about 25 members went to Macleod Lodge on Wednesday evening for the installation of officers of Granum and Macleod lodges. The officers of Coleman Lodge assisted in the installation, and Frank Barrington was in charge of the installation as district deputy.

DEATHS THIS WEEK

Miss Annie Forish, 28 years, living north of Burmis, died on Tuesday evening.

Tom Jones, 68 years, died at Blairmore on January 17.

Funeral arrangements were in charge of Crow's Nest Funeral Home.

Betty Holley, 14-year-old daughter of Mrs. W. Holley, died in Coleman hospital on Wednesday morning, where she had been a patient for a week, having been admitted suffering from appendicitis. The funeral will probably be held on Friday, though the date has not been definitely set.

Crow's Nest Funeral Home is in charge. General sympathy is expressed for Mrs. Holley.

Mrs. Nimcan, of West Coleman, died last Friday afternoon, and the funeral service was held on Sunday, burial in Coleman cemetery. General sympathy is expressed for the husband and two children. She was 41 years of age, and originally came from Czechoslovakia.

Sweaters, etc., have been kindly donated by the Grand Union, Coleman and Empire hotel proprietors.

A Fee-Wee hockey game is being arranged, but no definite information was available at time of receiving report.

Medicine Hat is negotiating for home and home games with the Intermediate team.

WM. STEVENSON WILL MOVE TO CALGARY

General Manager of Hillcrest Collieries Ltd. since 1917--Past Director of W.C.F.A.

Completing twenty years' service as general manager of Hillcrest Collieries Ltd., Mr. Wm. Stevenson's resignation will take effect on January 31st. Coming from Scotland to Canada about 1912, his first appointment was with a mining company in the Estevan-Bienfait fields. From there he went to Nordegg, spending five years there as civil engineer, followed by his appointment as district mines inspector at Blairmore for one year. His appointment as general manager of Hillcrest Collieries followed, and during his twenty years' management considerable development has been made. He was also a director of the Western Canada Fuel Association.

It is reported that Mr. and Mrs. Stevenson will make their home in Calgary. They have made many friends in the Pass towns, who will wish them well.

An ounce of happiness is more beneficial to a woman's complexion than a pound of cosmetics.

Local Effort To Aid War Sufferers in China

Appeal Sent Throughout Canada by Sir Henry Drayton--Bishop Sherman Makes Appeal to Alberta People.

Rev. A. S. Partington this week received a communication from the chairman of the Canadian Red Cross Society, Sir Henry Drayton, asking that local efforts be made to raise funds to help the innocent sufferers in China. The aggressive and merciless war carried on by the Japanese has stirred the sympathy of people throughout the world, and world-wide efforts are being made to raise funds for the relief of the civilian population in the war zones.

It has been suggested locally that every fraternal organization should contribute to a fund, and that a general committee be appointed to arrange for a complete canvass of the town. The aid of Boy Scouts and Girl Guides to carry on this canvass has been proposed, and it is hoped that everyone will respond by giving what they can. It is the combined efforts of all, even though the individual donation be small, that helps to raise a substantial sum.

Miss Yuill has already made an appeal through her Junior Red Cross branch in Cameron school, and it is hoped that all Coleman people will respond to the general appeal.

In Memoriam

BROWN: In ever loving memory of Nancy, beloved daughter of Mr. and Mrs. George A. Brown, who died on Jan. 23, 1932.

"Love and remembrance last forever."

"Safe in the arms of Jesus, safe on his gentle breast."

IN LOVING MEMORY OF Nancy Brown, who passed on January 22nd, 1932.

In her innocence and beauty, With her soul as pure as snow, She is nestled on the bosom Of the God we love and know.

— Lovingly remember by Wilma Halliwell, U. of A. Hospital, Edmonton, Alta.

Annual Bonspiel of Crows Nest Pass; Lethbridge, Cranbrook, Fernie and Pincher Creek Here --Association Banquet To-Night

The 27th annual bonspiel of the Crows Nest Pass Curling Association, which opened on Tuesday, with rinks entered from all points between Lethbridge and Cranbrook, is fast drawing to a close, and will be climaxed this evening with the annual banquet in the Grand Union hotel, at which it is expected about 125 curlers and guests will be seated.

"Mine Host" William Bell will spare no effort to make it a success from the culinary viewpoint, while President Sam Moores of Coleman Club and L. S. Herchner, of Fernie, secretary of the Association, (a position his late father held for many years) will see to it that the program is in keeping with the usual high standard of entertainment.

It is six years since the Crows Nest Pass Curling Association held its annual gathering here, and old acquaintances are renewed and new faces noticed among the visitors, all devotees of this grand winter pastime played for the love of the game and the friendliness it engenders among the members of the various clubs of southwestern Alberta and eastern British Columbia.

Coleman is indeed pleased to have them here. They serve to show that friendly competition in this grand old game is a very fine interlude from the cares of business and exemplify the spirit of "the game's the thing," not merely to win over an opponent but to enjoy the zest of friendly rivalry and to accept victory or defeat with the smile of acknowledgment that the best man wins, and all honor to him.

Since 1910 these gatherings have been held in the various towns "along the Crow." Somehow the spirit of curling seems to be more warmly engendered amid these friendly hills and dales than in the wide-open spaces. This is evidenced by the many veterans who turn up year after year, apparently no older in appearance, even though the years are marching on. Some have passed on who took part in those early bonspiels, but still the same warm enthusiasm prevails over a quarter of a century since the first bonspiel was held.

To R. W. Greenway, veteran skip of Lethbridge, and whose portly figure is familiar at many gatherings in southwestern Alberta, goes the credit for inaugurating a new competition—a points contest for individual entries, for which he is presenting a trophy. It may be that through lack of time the complete list of winners will not be made known in this issue, but possibly at this evening's banquet some of the "shining lights" of the "stone and beam" will be proudly beaming their cheerful smiles across the festive board.

"A hearty welcome to you, gentlemen!" is the spirit in which Coleman greets you, and may you carry away here—and jolly good luck to you, curlers! May you long continue to enjoy the grand old game and spread the leaven of harmony and friendship, which helps to make life well worth living.

WEDNESDAY NOON REPORT OF BONSPIEL

Three rinks remained undefeated at the end of Wednesday morning's play as Carmichael, of Blairmore; Beck, of Fernie, and Day, of Macleod, kept their record clean with four wins each.

Coleman rinks are now holding their own, though they lost several games during the first day of play. McBurney and Ledieu lost their first three games. McBurney won a seventh end, the only one of the 'spiel so far, against Beck, but failed to hold this advantage and lost out 15-14. Moores, in his game against Walker, of Macleod, trailed 8-0 in the first three ends, but came back strong to win out. Moores had won two out of three up till Wednesday morning. Other local entries who are faring well are Antle and Cousins.

Allison, of Pincher Creek, has only dropped one game up to Wednesday morning, receiving his first defeat at the hands of Cousins. Fisher is leading in wins among the Bellevue entries, having only lost one game. Fernie teams are winning the majority of games as regards club representation.

The banquet will be held in the Grand Union tonight, where the 1939 bonspiel will be awarded to one of the association's clubs. Election of next year's officers will also be made.

Over one hundred curlers entered in the 27th annual bonspiel of the Crows Nest Pass Curling Association, which opened on Tuesday morning, instead of Monday as originally planned, mild weather causing the local executive to delay the opening one day. But it did not lessen the enthusiasm of enthusiasts of this fine winter pastime, and keen interest has been taken in all events.

ANNOUNCEMENT

Mr. and Mrs. William Innes of Bellevue announce the marriage of their eldest daughter, Margaret Alma, to Mr. C. E. Huntington, of Calgary. The wedding took place in Victoria, B.C., on January 1. Rev. Dr. Innie of Emanuel Baptist Church, Victoria, officiated.

ENTRIES IN CROWS NEST PASS CURLING ASSN. BONSPIEL

Fernie--Stewart, Edgar, Sanborn, Beck.

Coleman--Moores, Antle, Ledieu, Allston, D'Appolina, Cousins, McBurney.

Blairmore--Bonnie, Carmichael, Kerr, Morgan, Oliva.

Bellevue--Fisher, Key, Ritchie, Dugdale, Upton.

Pincher--Allison, Walker.

Macleod--Day.

Lethbridge--Greenway.

WEDDINGS

COUSINS--KLISH

At Knox Presbyterian church, Calgary, on January 15, at 3 p.m., a pretty wedding was solemnized, when Miss Mary Klish and Mr. Melbourne Cousins, both of Coleman, were united in matrimony.

The bride was dressed in a powder blue satin gown with silver accessories, and carried a bouquet of red roses. She was given away by her father, Mr. Michael Klish. Miss Gwen Brown was the bridesmaid, and Mr. Roach Cousins supported the groom.

To the strains of "The Bridal Chorus" from "Lohengrin" the bride and her father came down the aisle to the altar, where the Rev. Thomas A. Rodger performed the ceremony. Following the service the party sat down to a sumptuous dinner at the home of Mrs. O. C. Ross, 631 11th Ave. W.

After crossing a few days in the city the happy couple spent a short honeymoon at Banff prior to returning to their home in Coleman, where Mr. Cousins is employed.

Mr. and Mrs. Charles Hughson, of Blairmore, announce the engagement of their eldest daughter, Clara, to Mr. Lawrence Ford, youngest son of Mr. and Mrs. George Ford, of Coleman, the marriage to take place early in February.

A Worthy Objective

There may be a good many people in Western Canada who could not give the exact location of Kingville, Ontario, but there are very few who have not heard or read about, and some who have visited, the institution for which Kingville is famous—the bird sanctuary owned and operated by Jack Miner, the great friend of wild life and of children.

Even those who are only slightly familiar with the great work that is being done by Jack Miner to conserve bird life for the enjoyment of posterity and to promote love for and kindness to wild life among adults and children, will be more than glad to learn that efforts are being made, not only to preserve the sanctuary for all time to come, but to enlarge it and thus extend the scope of its usefulness by adding to the premises.

Fame Is Wide-spread

The fame of Jack Miner's bird sanctuary has extended far beyond the boundaries of Canada, even beyond the confines of this continent. His conservation plans for the benefit of future generations are almost as well known in Europe as in Canada and the United States, and only two years ago he was approached by officials of the Government of Czechoslovakia for information and advice, as a result of which that country today has a chain of sanctuaries for bird life patterned after the Jack Miner sanctuary at Kingville, Ontario. Indeed, his influence may be said to have spread around the world and his example is probably doing more to inspire conservation of bird life than that of any other man living.

Those who have visited the bird sanctuary at Kingville know well enough the great human value of his work and it does not take much reflection to realize that it also has a material economic valuation. Tourists from all countries of the world are drawn to his door and none depart without carrying away with them pleasant recollections of scenes of beauty and lessons on conservation to serve a lifetime.

A Great Influence

A succinct summary of the value of the work of this pioneer bird bander is contained in the following tribute paid by Arthur Jensen, Game Warden for Essex County, Ontario, in a recent broadcast:

"In my opinion Jack Miner, the Canadian naturalist, and his bird sanctuary at Kingville, Ontario, holds the same place in conservation as Mr. Henry Ford holds in the realm of industry. Jack Miner has been twenty years ahead. The sanctuary system of conservation and artificial feeding of bird life which he has preached from coast to coast for the last twenty-five years has been an example which hundreds of individuals have copied as well as State, Provincial and Federal governments, with the result thousands of birds are alive to-day, yes, perhaps millions, through Jack Miner's influence both directly and indirectly."

What Jack Miner has done in the past quarter of the century to preserve many species of game birds for the benefit of sportsmen of this and future generations, for the enjoyment of the lover of all that is beautiful in Nature and for the benefit of the tourist, and industry dependent upon the tourist, cannot be calculated in dollars and cents. His work is a memorial which will endure throughout the ages and will be recorded in the pages of history, and the sanctuary itself is a memorial which should be preserved for the nation, for future generations, and as an attraction for visitors from other countries of the world.

Aid Is Required

Although some assistance has been rendered by governments to Jack Miner's enterprise, unfortunately the work has been carried on at a pecuniary loss and the operation of the sanctuary is encumbered by a deficit of \$10,000. He, himself, has passed the allotted three score years and ten and there is no guarantee that the enterprise at Kingville will or can be carried on after his demise unless some public-spirited individual or organization makes its perpetuation a financial possibility.

It is reported that an endowment of approximately a million dollars is required to ensure this happy consummation, with an additional \$250,000 to provide for an extension of the present crowded facilities.

Would Ensure Perpetuity

An endowment to ensure the continuance of this work and the preservation of what amounts to an international monument would be more than a happy gesture for such an institution. As the Rockefeller Foundation which, according to a compilation in an article in a recent issue of *Fortune* magazine, has already expended some twenty-seven millions of dollars creating national parks on the other side of the Canada-U.S. boundary.

In the expenditures he has already made for similar objectives, Mr. John D. Rockefeller, Jr., has given evidence of his realization of the value of outdoor recreation for humanity and the endowment of such an institution as the Jack Miner bird sanctuary would not only constitute a fine gesture of international goodwill on his part or on the part of some other wealthy citizen of the United States, but would emphasize the international value of Mr. Miner's efforts for the whole of mankind.

Takes The Championship

Women may be changeable, but County Auditor Earl Miliken of Seattle, gives the much-changing championship to a prospective bridegroom. The youth asked for his money back on a marriage license. Told that was impossible, he asked whether he could use it for another girl. The answer again was no. "Aw nuts!" he exclaimed. "Guess I'll go back to the first girl."

Card playing can't be very wicked; there isn't a black heart in the deck.

The Problem Of Employability

Physical Fitness Engaging The Attention Of British Columbia

More recent studies of national unemployment make a clear distinction between those who are employable and those who are not, and from statements made by Chairman Purvis of the Dominion's Commission and other authorities it is evident that too large a proportion of the unemployed are unemployable.

As there is a close relationship of physical fitness to employability, British Columbia's experiment in recreation work is of national interest. That work is in charge of Ian Eisenhardt, who contributes a most informative article on the subject to "Health", the publication of the Health League of Canada.

In the course of this article, the writer says: "Broadly, the scheme may be described as one to extend to all classes certain physical advantages that formerly were enjoyed by only the more favored."

"The State is interested in the mental as well as the physical health of its people. You cannot have a healthy mind without a healthy body, but neither can you have a really healthy body without a healthy mind."

"When the Government launched the British Columbia Physical Training Scheme, the women were not forgotten. Physical fitness of our young women is no less important than that of the boys. And the women have availed themselves of the opportunities afforded, and to-day only a number of the men members considerably."

"The work of the Centres is to provide an inspiration to give advice and to assist in organizing, and also to inspire those who, for various reasons, would be unable to take part in sports and games, to join in the wholesome activities which the Centres provide. Although we here in British Columbia are leading the Dominion of Canada, through this scheme, it will take some years before we can really measure results. We have a long way to go yet, and we shall not be successful until all our citizens are convinced of the value of physical fitness."

Has Memory For Numbers

Man In South Africa Never Forgets One He Sees

A memory wizard has been discovered at Riverdale, South Africa. He is 24-year-old Jacobus Britz, a cripple, who earns his living by doing odd jobs, such as running messes, Britz's specialty is numbers. Without hesitation he can rattle off the registration number of any one of Riverdale's 1,300 motor car owners. If the names of car owners are called out at random, he can not only give the numbers of their present cars but those of cars previously owned by them. Britz can remember the answers to all the sums he did at school. If he is given a haul of bank notes he can, after giving them a quick glance, repeat their numbers without hesitation. He was educated at a little country school in the foothills of the Langeberg. His powers seem to be confined to mentalising numbers.

Use Clay For Food

Natives Of Papua Say It Has A Medicinal Effect

Clay is a food delicacy to a tribe living on the banks of the Fly River, Papua. This was discovered by a patrol officer who has returned to the coast from the middle reaches of the river. The men of the tribe collect the clay, mould it into balls, and dry it in the sun. They eat them mixed with other foods. The tribespeople declare that the clay has a medicinal effect. It makes their heads clearer, they say, and gives them courage in battle.

Just A Hint

At a smoking concert one of the company, who was a little inebriated, insisted on singing several songs. As he did not possess the slightest vocal ability his efforts were not appreciated.

At last one exasperated listener cried:

"Do you know 'The Long, Long Trail'?"

"Yes," replied the gratified vocalist. "Shall I sing it?"

"No, like it," was the unfeeling reply.

Giraffe Grows Rapidly

The baby born Dec. 26 at Whip-smade Zoo, London, to Peter and Rosie, the Darango giraffes, grew 10 inches in a day. At birth it stood five feet, four inches. The baby giraffe grew to a height of six feet in 24 hours; a zoo official declared.

During the early days of the World War, sea lions were trained to track submarines.

Soil And Climate

Saskatchewan Problems Dealt With By University Professor

Problems arising from Saskatchewan soil and climate and the province's farm settlements will not be solved for 20 or 25 years, Prof. John Mitchell, of the Saskatchewan University soil department, told the Adult Education Association at Saskatoon.

Dr. Mitchell began a new series of addresses to the association based on the provincial government's submission to the Rowell commission on Dominion-provincial relations.

Problems included soil fertility, climate, land utilization, northern settlements and the social questions raised by combination of these factors.

Saskatchewan lands had lost much fertility through drought, Prof. Mitchell declared, but practically all this loss had occurred on soils originally poor wheat land and had been occasioned principally by drifting. Little of the loss came from excessive cropping.

Even within the drought area much land suitable to other production would go on producing good wheat crops in years of normal rainfall for the next 100 years. The only point to be watched was that this land be given no opportunity to drift.

New problems were being created by settlement of northern Saskatchewan bush land, generally even less fertile than the poor land of the drought area.

Research Council

Monitors Planning For Scientific Investigation Of Waste Products In The West

J. M. Davidson, managing secretary, announced that steps had been taken by the Winnipeg Industrial Development Board toward the formation of a provincial research council for scientific investigation of the waste products and surpluses in Western agriculture.

"Valuable work has been done on the use of organic materials in industry by the National Research Council but many believe it is influenced too much by eastern manufacturing and political interest," he said. "There is a feeling that it might well function to a greater extent in the interests of the West."

"For the past two years, the Industrial Development Board has attempted to revive interest in the question of industrial and agricultural research in Canada in the hope that work already done by the National Research Council, which has millions of dollars invested in this work, would be reviewed," he added.

Increased Armaments

Great Britain To Strengthen Her Rapidly Growing Navy

Italy's accelerated naval program was generally viewed in London as calling for even further strengthening of Great Britain's rapidly growing navy.

Scarcely had the wires from Rome ceased humming with the news when admiralty circles openly talked of laying the keel this year for battleships of from 46,000 to 52,000 tons carrying 16-inch guns. The largest man-of-war afloat, the British battleship Hood, is of 42,000 tons, carrying 16-inch main armament.

British sources say Premier Mussolini's latest armament gesture as bringing to the fore anew the problem of balance of power in the Mediterranean. It goes without saying they declared that Italy's move will weigh heavily in the British admiralty's deliberations of the next few months.

Within Realm Of Reason

U.S. Airman Believes Entirely Automatic Plane Is Possible

The entirely automatic aeroplane operating from takeoff to destination without the touch of a human hand, "is well within the realm of reason," Capt. George V. Holloman, of the United States Army Air Corps, said in a paper prepared for presentation to the Society of Automotive Engineers.

His treatise described the army's experiments with robot flights and robot landings. The army planned the experiment permits bringing an aeroplane to the ground by the use of radio waves and ingenious devices which even go so far as to apply the brakes gently after the plane is on the airport and rolling across the runway.

The latest models of trailers have shower baths and hot water. They offer you all the comforts of home, including plumbing troubles.

PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions for sale. Send for free literature. THE RAMSAY COMPANY, 115 McMorris, 273 Bank Street, Ottawa, Canada.

Just a few drops of Vicks Vapo-r-nol up each nostril reduces swollen membranes, clears stuffiness, brings prompt relief. Used in time, helps prevent many colds.

VICKS VAPOR-NOL

Satisfied At Home

People In Britain Have No Incentive To Emigrate

The Empire migration problem is not limited to the fact that at present the Dominions do not want immigrants because they have many of their own people unemployed, according to Sir Charles Malcolm Barclay-Harvey, M.P., in the British House of Commons for Kincardine and West Aberdeen.

It is complicated by the fact that social legislation in Britain has made the security of the working man there something that he will not likely surrender for the privilege of pioneering far from his home.

"I don't mean that our people have become softies," he told a reporter. "I am a strong advocate of Empire migration and I hope and believe that the problems can be solved. But I do wish to point out that the British working man has a far greater measure of security and ease than had the great bulk of emigrants who left Britain in the old days to better their condition through pioneering in the unexplored lands."

"Under present circumstances people who might have migrated from Britain in the old days feel that migration to-day would mean that they would have to give up more than they could gain in any of the Dominions."

Does Not Happen Often

But Snow Sometimes Falls For Many Hours In Texas

"Don't let anyone tell you they never have snow in Texas. They have storms that last for hours and the snow comes down in abundance, states W. L. Clark, in the Windsor Star.

We know because we drove for more than 400 miles in a snowstorm in West Texas. It was soft and slushy, but all it needed was a few more degrees of frost to turn the roads into skating rinks of ice.

Those snows don't happen very often and Texans excuse them by declaring they are "unusual," but that does not alter the fact that the snow in Texas is just like the snow in any other place, and it makes the roads as slushy and messy.

ALICE STEVENS' RECIPES

"DISHPAN HANDS" NEED NOT BE UGLY

With a little daily care, hands may be kept smooth and soft, even through cold, harsh weather and battles with the dishpan.

For a non-greasy hand lotion mix four teaspoons of glycerine, one pint of boiling water, one level teaspoon of powdered gum tragacanth and 11 drop oil of bitter almonds. Shake the mixture well or beat it smooth with an egg-beater.

For stained nails and hands—rub them with vinegar, lemon, tomato, rhubarb juice, cucumber, pumice stone or cornmeal moistened with buttermilk.

For a good cuticle remover add one teaspoon of vasoline to one teaspoon powdered pumice.

For brittle nails, hang nails or cracked finger tips dip the fingers in warm oil or fat before retiring. Mutton tallow is found to be specially healing. It is also advised that flaxseed be eaten, as this adds oil to the system.

Dishwashing can be a beauty treatment and "dishpan hands" can mean soft, white ones. Use the dishpan with a mild soap in warm water and the scalding is done in the dish-rack. Afterwards, the cuticle which has been softened in the warm water should be gently pushed back and then the hands should be rubbed with a lotion or cream.

When making applesauce, keep the apples covered so that the steam helps to cook them. Do not add the sugar until the apples are soft.

In baking apple pies, use a strong under crust to prevent soggy undercrusts. Carrots make a good substitute for pumpkins in making pies.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Union, 115 McMorris, 273 Bank Street, Winnipeg, Man.

New Cold Storage Method

Chickens Frozen Fourteen Months Keep Without Blemish

A new method of handling poultry in cold storage, likely to be of great value to Canadian exporters, was proven at the National Research Council building, Ottawa, when a box of frozen chickens was taken from a storage vault after 14 months—with not a freezer burn on them.

This new method, developed over the past few years by Dr. W. H. Cook, eliminates the peck marks or freezer burns which ordinarily appear after a few weeks' of storage, reducing salability because of the birds' spotted appearance.

After months of tests, a wax paper lining in the packing box was completely sealed, with this successful result.

Poultry Exports

More Dressed Poultry Shipped In 1937 Than Any Other Year

More Canadian dressed poultry was exported in 1937 than in any other year, the department of agriculture reported with figures which showed a 79.9 per cent. rise over those in 1936.

Exports in the year just ended totalled 88,996 boxes compared with 49,452. Weight of the 1937 shipment was more than 2,687 tons.

There was also a record export movement of live poultry from Canada to the United States in 1937. In the first 11 months of the year, American buyers took 1,157,768 live chickens and fowl, compared with 344,937 birds in 1936 and 35,547 birds in 1935.

Activity In North

Transportation Companies Doing Big Business In Northwest Territories

Transportation activity in the northwest territories reached a new high in 1937 when the four principal transportation companies, using steam and Diesel-powered boats, carried 23,000 tons of freight from and to Waterways, Alaska, at the end of the year, the federal department of mines and resources reported.

In addition, two main airway companies handled 600 tons of freight and supplies, and due to increased mining activity the transportation companies are looking forward to an even heavier movement in 1938.

Sponges range in size from a speck the size of a pin head to giant growths taller than a man.

I LEARNED TO 'BEAT' ACID INDIGESTION

ONCE LIFE WAS MISERABLE. NO APPETITE... LITTLE SLEEP...UNTIL THE DOCTOR SAID 'ALKALIZE'

BUT NOW—AT THE FIRST SIGN OF ACID-INDIGESTION I USE PHILLIPS' AND I FEEL LIKE A NEW PERSON ALMOST IMMEDIATELY!

The fastest way to "alkalize" is to carry your alkalizer with you. That's what thousands do now that genuine Phillips' comes in tiny, peppermint flavored tablets—in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoons of liquid Phillips' from the bottle. At once you feel "gas," nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

New Air Agreement Between Canada And U.S. Along Old Lines

Washington. — A conference of Canadian and United States air experts studying civil aviation of the two countries, proposed an air agreement between the Dominion and the United States that is a modern counterpart of treaties of commerce and navigation begun centuries ago when sailing vessels were the means of transport.

The agreement, subject to the approval of the Canadian and United States governments, is really four agreements referring to air navigation, issuance of pilots' certificates, recognition of certificates of airworthiness of planes for export and arrangements on the use of radio for air services.

It was worked out at a four-day conference here between an American delegation presided over by R. Walton Moore, assistant secretary of state, and a Canadian delegation under V. I. Smart, deputy minister of transport.

Canada would have with the United States the equivalent of a treaty governing air navigation.

Each country would grant liberty of passage over its territory in time of peace to the civil aircraft of the other country.

No regular air route could be operated in the territory of either country, however, without its prior consent.

Under terms of the proposed agreement, aeroplanes must be provided with certificates of registration and airworthiness; their pilots and crews must have licenses; planes must abide by the customs, immigration and air traffic regulations of the other country and must not fly over prohibited areas.

Equality of treatment would be guaranteed the aeroplanes of the other country with regard to air navigation facilities, weather reports, radio facilities, and payment of landing fees.

The agreements would do away with the previous necessity of applying through diplomatic channels for permission to fly to other countries.

The new agreement abolishes the lines of regulations of 1929 which the conferees said, needed revision "due to the great increase in aerial communication between the two countries."

Traffic Violations

Ontario To Tighten Up On Court Prosecutions

Toronto. — In future traffic act violations in Ontario which justify court proceedings the prosecution shall be vigorous and the sentence adequate to the offence, according to Hon. G. D. Conant, attorney-general. The motor vehicle act of 1929, the provincial police will be increased substantially. Crown attorneys have been instructed that intoxicated or reckless drivers shall be the particular target.

Basque Language Banned

London. — Insurgent General Franco has forbidden Basques under Spanish insurgent control to speak their ancient language or wear their colorful native dress, Jose Ignacio de Lizaso, the Basque agent here, charged.

Advancing Date Of Northern Ireland Vote Clever Political Move

London. — Action of Prime Minister Winston Churchill in advancing the date of the Northern Ireland general election to Feb. 9 instead of early May was interpreted by observers here as a shrewd move to capitalize on the fact that partition may be an issue in the Anglo-Irish talks taking place in London.

The statement by Eamon de Valera, prime minister of Eire, that the 18-year-old division of Ireland into north and south will be raised by the Irish delegation has given the Northern Ireland premier a made-to-order election issue, they said.

At the same time, informed quarters said, it is unlikely partition will build largely in the discussions designed primarily to settle the economic "war," which has largely dried up Anglo-Irish trade since 1922, and to find a working arrangement for defence. The problem of partition will be too difficult of solution to take up much of the conference's time, they predicted.

Will Be Considered

Farm Machine Bill To Receive Attention Early In Session

Ottawa. — Canada's \$50,000,000-a-year farm implement bill will be given early consideration in the House of Commons with the report of a parliamentary committee forming the basis for a discussion left over from last year.

After some 10 meetings at which an exhaustive inquiry was made into prices, manufacturing, marketing costs and other relevant aspects of the industry, the committee presented a report which was moved for adoption the day parliament prorogued. The motion was left standing.

Prime Minister Mackenzie King gave the house assurance that at the early stage of the next session the opportunity would be given for a full discussion of the committee's recommendations.

Conclusions of the committee were that the farmer was paying too much for farm implements and that tariff and other action should be taken by the government to bring the price level down.

Abandon Search For Flyer

Coupled Fate Of Aviator Will Not Be Known Until Melting Of Snow

Winnipeg. — Search for Mike Sawchyn ended with ground and aerial crews convinced only melting of winter snow in Riding Mountain national park will reveal the fate of the 22-year-old Sifton, Man. flyer, missing since leaving Sarnia, Ont., Dec. 30, to fly 125 miles north to his home.

Search pilots believe Sawchyn's plane crashed and was destroyed by fire, snow hiding the wreckage from eyes of observers.

Planes may search the area after winter ends much before spring foliage appears on deciduous trees in the park when wreckage could be more readily located.

Last of five planes to end the nine-day search, a P-12 biplane, chartered and landed at Winnipeg from search headquarters, Dauphin, 155 miles northwest.

Royal Canadian Mounted Police announced the ground search was ended, at least until spring.

Increased Dairy Production

London, Ont. — W. Stacey of Mitchell, in his presidential address before the 71st annual convention of the Western Ontario Dairywomen's Association, said that in 1937 the value of Canadian dairy factories production was estimated at about \$228,000,000, \$20,000,000 more than the 1936 total and \$35,000,000 more than that produced in 1935.

Dates Have Been Changed

Ottawa. — Dates for the Alberta and British Columbia hearings of the royal commission on Dominion-provincial relations have been switched by the commission officers announced. The British Columbia hearing will open at Victoria, March 9, and the Alberta hearing at Edmonton, March 21.

Student Safe In Athens

Canadian Boy Held By Italian Authorities Was Released

Ottawa. — Robert Musk, young Ottawa and Prince Albert, Sask., student, reported held in jail last month by Italian authorities for two days without explanation, is "now okay" in Athens.

H. J. Hillyer, a friend of Musk's living near here in suburban Lincoln, said a cable from the 20-year-old student told of his safe arrival in the Greek capital.

Former student at Ashbury college and Lisgar collegiate here, Musk wrote from Naples Dec. 18 that he had been seized by Italian officials between that city and Brindisi and jailed Dec. 8 and 9 after a long examination in French during which he was unable to determine the reasons for his detention.

The British consul at Naples finally obtained his release. In his letter, Musk said the consul told him he believed his detention was due to the "anti-British campaign going on there."

Musk left Canada on a grain boat last July.

Replacing Old Guns

Two New Ones Will Protect Harbor Entrance At Vancouver

Vancouver. — Two new six-inch guns will be placed on the foreshore of Stanley park by the department of national defence for protection of First Narrows, entrance to Vancouver's harbor, it was announced by R. Rowe Holland, chairman of the Vancouver parks board.

Holland told the board he had received a communication from the defence department informing him guns which have protected the harbor entrance since 1914 would be replaced by two of a new type.

The new guns would be placed 300 feet back from the foreshore of the park at a spot known as Ferguson Point. From there they could command part of English bay and Burrard inlet, outside the harbor entrance.

Will Send Books

Reading Matter To Be Provided For Drouth Areas

Winnipeg. — The nation-wide canvass of the Association of Canadian Bookmen for books to be sent to the Saskatchewan drouth area will be reinforced by a campaign here by the Winnipeg youth men's board, under A. J. Wishart, president, announced.

Volumes will first be sent to Winnipeg to be sorted into libraries of 50 to 75 books each. The libraries will then be sent to the needy districts. The libraries will be moved from time to time so each community will obtain the books.

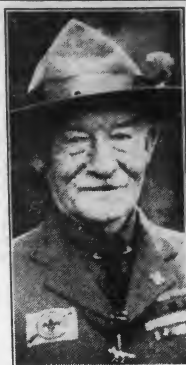

Will Make Annual Trip

Trust Fund Enables British Schoolboys To Visit Canada

London. — W. H. Rhodes, of Bradford and London, chairman of the Allied Industrial Services, donated \$125,000 for the establishment of a special trust fund under which 50 secondary schoolboys will be enabled to visit Canada annually during the next 10 years.

Last year Mr. Rhodes took 30 schoolboys on a return trip to Canada as a coronation gift. The new scheme, under the patronage of Earl Baldwin, will be known as the W. H. Rhodes Canada Educational Trust.

ILLNESS STOPS TOUR

Lord Baden-Powell, 81-year-old Chief and founder of the Boy Scouts, who has been forced to abandon his visit to Rhodesia and South Africa due to illness. The Chief Scout will remain in Kenya until he returns to London in April.

Broke All Records

Prince Albert Stock Yards Usually Busy During 1937

Prince Albert, Sask. — In volume of livestock marketed, 1937 broke all records at Prince Albert stock yards. Manager G. T. Watson, northern Saskatchewan Co-operative Stockyards Limited, reported.

The year 1928 was the only one in which volume figures reached with-in striking distance of last year's. Receipts, including through billing, of cattle, calves, hogs, sheep and horses, totalled 55,143 in 1937 and 52,465 in 1928. The corresponding figure for 1936 was 41,718 and for 1935, the poorest year since 1925, 25,692.

Due to lower prevailing prices, the value of livestock handled in 1937 was below the corresponding figure for 1928, but higher than that for 1936. Value of all animals marketed in 1937 is estimated as \$885,176 compared to \$1,231,404 in 1928 and \$806,818 in 1936.

Study Criminology

Would Send Men To Regina For Instruction

Edmonton. — Intent on keeping up with the rapid advance in modern criminology, Chief Constable Shute communicated with the Royal Canadian Mounted Police officer commanding in Regina for information concerning the training school held there for police recruits and officers.

"We have capable instructors now but if we could add to their knowledge I would like to send a man to the R.C.M.P. in Regina," Chief Shute explained.

Calgary police are going to school twice weekly at Calgary to obtain instruction from Sergeant William Eager, trained in the Regina school.

Scouts Urged To Help

Ottawa. — An appeal to Boy Scouts throughout the nation to assist the Red Cross in the China relief fund campaign has been issued from Dominion headquarters of the Boy Scouts Association following a meeting of the association's executive board. The campaign opens Jan. 23.

Battery Defence For Vancouver Harbor Is To Be Developed

Vancouver. — The Vancouver Daily Province said secondary coast defence for the protection of Vancouver harbor, "Canada's most important Pacific port, will be developed immediately."

The Daily Province said the first move would include:

"Establishment of a battery of two six-inch guns at Ferguson's Point, department of national defence in Stanley park (as announced by the Ottawa.)"

"A similar battery to be established somewhere on the Mount Grey headland."

"Organization of militia units of coast artillery for training of personnel to man heavy guns and searchlight batteries."

Point Grey, named by the paper as the second defence point, is a promontory about five miles long which forms one side of English Bay, the entrance to Vancouver harbor.

The paper said the Point Grey battery, which might not be established immediately, would be designed as a "counter bombardment" unit, and its duty would be "to prevent an enemy warship lying out in the Gulf of Georgia) to bombard Vancouver."

Work on the Stanley Park battery would start immediately, it was stated.

Ottawa. — The defence department confirmed intentions to establish a gun battery in Stanley Park, Vancouver, as a defence of the entrance to Vancouver harbor, despatches from the Pacific coast city which quoted R. Rowe Holland, chairman of the Vancouver parks board.

A battery for the close defence of Vancouver has been recommended by the staff officers of the department of national defence as a necessary part of the Pacific coast defence program now being carried out. The only suitable site for such a battery is at Ferguson point in Stanley Park. As the appropriations for the current year include a sum for this undertaking, plans have now been completed and instructions to proceed have been issued.

Winnipeg. — Japanese know the inland passage between the mainland of British Columbia and Vancouver Island better than Canadians or Americans, said Mrs. George Black, independent Conservative member of

parliament for the Yukon, a visitor in Winnipeg.

"I've been up and down that coast for 40 years. Where there was one Japanese fishing boat, there are hundreds now," she said.

"If the Japs made up their minds we were interfering too much in the Far East they could give us a taste of high light right here on our own shores," she said, regarding possible Japanese invasion of Canada.

"Now we are scared. At least we are going to do something about defence on the Pacific coast."

To Strengthen Defences

Britain Plans To Make Freetown A Strongly Fortified Harbor

London. — Moves to bolster the defences of the empire's secondary line of communications eastward from England to India by way of the Cape of Good Hope have been announced by the war office.

A permanent garrison will be stationed at Freetown, Sierra Leone, and the coast defences and supply bases at that central African point will be modernized and enlarged.

Storage tanks for gasoline and other fuels will be constructed and new pipe lines installed. Work now will start soon to enlarge the port.

A war office commission is in Freetown to report on the exact needs from the point of view of men and material to transform the port into a strongly-fortified harbor.

Fewer Deaths Reported

Saskatchewan Gaining Ground In Fight Against T.B.

Saskatoon. — To illustrate how tuberculosis had lost ground among the white population of Saskatchewan, Dr. H. C. Boughton, superintendent of the Saskatchewan sanatorium, reported there had been only 18 deaths from tuberculosis at the hospital in 1937 as against 26 deaths in the previous year and 54 in eight and a half months in 1935, the year the sanatorium was opened. The hospital has been filled to capacity since its opening. Doctor Boughton believed a check at the other two sanatoria of the Saskatchewan Anti-Tuberculosis League would reveal similar trends.

French Cabinet Resigns As Socialists Withdraw Support

Paris. — Premier Camille Chautemps and his government have resigned. The Socialist break in coalition shattered by the withdrawal of Socialist supporters.

The resignation came at a time when France faced severe labor unrest and a weakened front that slipped on world exchanges despite government efforts to support it. Chautemps and his cabinet handed their resignations to President Albert Lebrun when it became apparent that withdrawal of support by

nine Socialist ministers within the government left no alternative. The Socialist break in coalition shattered by the withdrawal of Socialist supporters.

The Socialists made up about half of the cabinet, the remainder being from the Radical-Socialists, headed by Chautemps himself. The Socialist decision to withdraw came after party members retired from the chamber of deputies for a private meeting to decide whether or not they could continue to back up the government in its fiscal and labor policies.

Particularly at stake was the premier's firm stand against any control of exchange.

Daladier's announcement came spectacularly at a time when the chamber was preparing to vote confidence or non-confidence in the government.

Chautemps, in his third speech of the all-night session, angered Communists and Socialists when he told the Communists "I give you your liberty" after they asked for freedom from the Popular Front solidarity, indicating they would abstain from voting in the confidence ballots.

Socialists immediately withdrew for their conference. Feeling that freedom from the Communists had broken the Leftist coalition that has governed France since the spring of 1936, they withdrew from the government.

Chautemps' cabinet was formed in June, 1937, to succeed the first Popular Front government headed by Blum. Blum resigned when the senate refused him decree powers to handle France's financial difficulties. He then entered the Chautemps cabinet.

ONTARIO LEGISLATURE COMMENCES NEW SESSION IN FEBRUARY

Ontario's Twentieth Legislature will commence its first regular session on February 23rd, a month earlier than originally planned in order that its deliberations may be completed before the Rowell Commission commences its Ontario sittings. The session should be an interesting one with matters of taxation, power, etc., promising to come into debate. Above are pictures of Ontario's new Lieutenant-Governor, Hon. Albert Matthews (left), while at the right are Premier Mitchell Hepburn (top), and Hon. Leopold Macaulay (bottom), new House Leader of the Conservative Opposition. The main picture shows an unusual view of the main building of the Parliament block.

Lord Craigavon recalled his frequently repeated declaration of the "loyal solidarity of the Ulster people" against reunion with the southern counties, adding:

"The opportunity now presents itself to allow the people to pronounce upon the issues themselves and I have no doubt as to the answer they will give."

"If de Valera points a revolver at Britain—and at Ulster—he will receive a speedy answer," the Northern Whig, Conservative, declared in commenting on recent conversations.

"Britain is well aware of the determination of Northern Ireland to oppose to the utmost the fusion of Ulster with the south," the newspaper continued.

The Irish News, Nationalist, said "removal of the artificial barrier between Irishmen and Irishmen in their own country is essential if negotiations between England and Eire are to lead to better understanding."

THURSDAY, JANUARY 20, 1938.

NOTES AND COMMENTS

NOVA SCOTIA'S mineral production during 1937 eclipsed the production of all previous years in the post-war period. It exceeded in value \$33,137,998, and afforded employment to 21,909 persons. These figures were issued by Michael Dwyer, minister of public works and mines, in a large display advertisement in the Springhill Record, a weekly newspaper published in Springhill, a town whence many Coleman residents came. There was produced in coal a total output of 7,309,298 tons.

NOVA SCOTIA is fortunate in having a forceful minister of mines in Hon. Michael Dwyer. He knows his business, whereas in Alberta the cabinet position of minister of mines is held by one whose adherence to Social Credit principles is apparently the prime qualification for the important job. Industry in Alberta, instead of being helped, is being hindered by government restrictions and increased taxation. This increased burden not only hits the larger corporations and companies, but it also affects every person in Alberta.

THE EDMONTON correspondent of "Canadian Business," a monthly magazine published by the Canadian Chamber of Commerce, states that the amount of money required to run the province today is \$6,000,000 greater than in the years 1928-29, and the per capita cost of government in Alberta has risen from \$11.59 for the fiscal year 1935-36 to \$14.45 for the fiscal year 1936-37. In the face of these figures even those favorable to the present government cannot maintain that Premier Aberhart is doing anything to abolish poverty in the midst of plenty, or that taxes are less than prior to his coming into power.

CONFIDENCE of investors will not be restored to the province as long as repudiation of debt and interest is allowed to take precedence over honesty and integrity in governmental business dealings. "Canadian Business" states:

"Numerous resolutions and protests emanate from the conventions and meetings, of which are cited a few diagnostic of the disturbing and disruptive intent of Social Credit leaders:

- (a) Recall of certain senators;
- (b) Abolition of the R.C.M.P. in Alberta;
- (c) Dismissal of the Lieutenant-Governor, or withholding the appropriation for the maintenance of the gubernatorial office;
- (d) One representative of the King in Canada is enough;
- (e) Election of judges by popular vote;
- (f) Abolition of the Grain Exchange;
- (g) Pensions for all over sixty years of age without taxation, but paid by the government creating currency.

"With all his bravado, Aberhart is not a happy man these days. The Social Credit Board wants to steal the spotlight from the Premier and the Cabinet; it has become a second Cabinet. Mr. MacLachlan, the Chairman, says they are at war and he might add that the whole of the enemy is not outside the Social Credit ranks. Prophet, priest and king, as Aberhart deems himself, of the Social Credit movement, his egotism and arbitrariness have made him unpopular to many of the private members, and some of his Cabinet. It is alleged that two of the younger members of the Cabinet disdain Douglas and have no confidence either in him or Aberhart, and though they appear on Social Credit platforms, their hearts are far from their words. They see no hope for the Social Credit theory and favor a refunding plan at low rates of interest. To continue in public life, which they have just tasted and enjoyed, they foresee no future for them except a sane, moderate plan of provincial finance, and it is reported that a short time ago they placed their resignations on the Premier's desk, but he prevailed upon them to continue for a time at least.

"The Social Credit Board disagrees with Aberhart in his refusal to submit a brief to the Rowell Commission. Powell (the Douglas expert) and MacLachlan want to make an elaborate submission on Social Credit, and one can easily imagine how loath the Premier is to expose his financial hodge to the dissecting criticism of the Commission. He will fare no better than Douglas did before the McMillan Commission in London, when his theories were plainly demonstrated a reduction

in absurdum. These two members of the Board would gladly shelve the Premier, and MacLachlan is trying to outdo him in the country in denunciation of the financial interests, promises of repudiation, and payment of dividends impliedly by sequestration of the few millions of unaccepted interest now lying in the treasury, and refused by bondholders when the interest rates were cut in two."

TO RESTORE confidence and to unite people of all parties opposed to present governmental policies, the People's League was organized. John I. McFarland, of Calgary, as chairman, has forty years record of business life in this province, and is a good choice because of the confidence farmers have in him for his services to the old Wheat Board. It is not known if E. L. Gray, provincial Liberal leader, will later join in the Unity movement, though it is possible he will realize that party politics as practised by the established parties will not be condoned by an electorate determined to retrieve the good name of Alberta.

JUST WHAT relationship the Calgary Albertan has to the Social Credit movement at the present time is difficult to know. It still states in its masthead that it is "A Publicly Owned Newspaper Supporting Social Credit Principles," yet at the convention last week a resolution was brought forward to have a paper published in Edmonton—"To-Day and To-Morrow"—designated as the official newspaper. This latter paper was started about two years ago with Lucien Maynard, a cabinet minister, as its editor. Mr. Aberhart, it will be recalled, in one of his broadcasts, asked people to support the Albertan by buying shares.

A NEWSPAPER that is conducted merely for propaganda purposes usually is not successful from a business standpoint, which is the reason that purely political newspapers have long since died a natural death. They have to be maintained by subsidies or other expedients, and are usually sinkholes for other people's money. A newspaper to continue in public service free and untrammelled by party coercion or any other form of "hamstringing" has to stand on its own basis of merit and business-like administration, be it a metropolitan daily or an Alberta weekly. The history of the newspaper world is strewn with wrecks of political propaganda "organs." One of the easiest and quickest ways for the untalented to lose money is to try running a newspaper.

THERMOSTOTTLE AND HIS CODFISH

Thermottottle was an ancient Greek philosopher. He spent his whole life in experimenting on his pet theory that any living thing could gradually change from its natural environment to an entirely different one, and still enjoy life as before. After devoting many years building up his theory, and as old age was creeping upon him, he resolved to prove to the world that his experiments had not been in vain. He decided to try his next experiment upon a codfish which he had caught.

He built a large tank beside his house, filling it with salt water from the ocean. Into this tank he put the codfish, which appeared to be thoroughly satisfied with its new home. Each day Thermottottle removed one teaspoonful of salt water and replaced it with the same amount of fresh water. The fish's diet consisted of minnows and sea worms which Thermottottle had gathered from the ocean. This diet was gradually changed to scraps of meat and bread which he threw into the tank. The codfish at first objected to eating such food, but gradually began to relish it.

Thermottottle's experiment began to show signs of progress, and faithfully, day after day, he removed one teaspoonful of salt water and replaced it with an equal amount of fresh water. He gradually increased the meat diet. Three years passed, and upon analyzing the water in the tank he found that it contained very slight traces of salt. His codfish was gaining in size and weight and so he decided to pursue his experiment further. Each day for the next three years Thermottottle removed one teaspoonful of water from the tank, and the level of the water gradually became lower. The fish, by this time, was subsisting on a diet, chiefly of meat and scraps from its master's table. As the water level became lower and

lower, the fish attempted to do very little swimming, but would splash aimlessly in the bottom of the tank. One morning Thermottottle was astonished to see four small legs appearing on the bottom of the codfish and the tail was diminishing in size. When all the water was finally drained from the tank, the codfish had developed legs and feet and a short narrow tail. Thermottottle was overjoyed at the outcome of his experiment and he received wide acclaim from the people. The king honored him by bestowing on him a vast estate.

As this great philosopher was growing old, he retired from his very active life and spent his time strolling through the woods on his estate, followed by his faithful codfish. One day, while walking beside a small stream, Thermottottle was idly musing upon the events of the past, when he suddenly heard a loud splash. Looking around, he saw his codfish struggling helplessly in the water. He rushed to its aid but was too late—the codfish had drowned.

Humorist: An Indian girl who claims to be a descendant of Sitting Bull recently obtained a lucrative film engagement. She is now Sitting Pretty.

Detroit News: Ed Wym in his new show says, "If they miss two more debt payments, America will own the last war outright." While we wouldn't call it a worst joke, it has been around.

Notice to Creditors and Claimants

In the estate of Joseph Lysek late of the Town of Coleman, Alberta, Miner and Merchant, deceased.

Notice is hereby given that all persons having claims on the estate of the above named Joseph Lysek, who died on the 18th day of November 1937, are required to file with the undersigned solicitor for the Administratrix of the estate by the 21st day of February 1938, a full statement duly verified, of their claims and any securities held by them, and that after that date the Administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

Dated this 13th day of January A.D. 1938.

Accomplishment requires Unity of Purpose

CAPITAL and LABOR working co-operatively for mutual benefit are essential for stability in any industry. They are inter-dependent. No industrial enterprise can succeed if it is intermittently disrupted by costly disputes.

COLEMAN mine workers for nearly six years have uninterruptedly maintained a spirit of co-operation through their own regularly appointed committees.

SINCE 1903, when the International mine was opened Coleman has developed from the hamlet status to that of the most important steam coal mining centre in the Province of Alberta. 800 employees and a bi-monthly pay-roll of approximately \$40,000 creates business for the town and the province.

THE COAL INDUSTRY means much to Alberta in providing employment, in provincial revenues and in the development of a vast natural resource.

King Cotton and the Commonwealth

KING COTTON is so old that he makes the British Commonwealth seem a mere stripling. Yet the Empire occupies an important world position both in the growing and the spinning of cotton.

FROM time immemorial, cotton has been cultivated in India and the adjacent islands. Parts of British Africa have known cotton since the sixth century before the Christian era.

FOR cotton spinning within the Empire we must look mainly to England, India and Canada. Our own primary cotton-textile industry is, of course, small compared to the great industry in Lancashire.

THE spinning of cotton yarn and cloth in this country gives employment to twenty thousand persons. This is more than are employed, for instance, in dairy factories or in automotive manufacturing. Canadians employed in the cotton spinning industry are paid annually over fifteen millions of dollars.

DOMINION TEXTILE COMPANY employs seven thousand Canadians. And it pays them \$5,000,000 annually. Its plants are the main source of employment in five communities of Quebec Province and contribute largely to employment in a sixth.

TOWN of COLEMAN FINANCIAL STATEMENT

FOR THE YEAR ENDING DECEMBER 31, 1937

Calgary, Alberta,
8th January, 1938.

The Mayor and Councillors,
The Town of Coleman, Alberta.
Gentlemen:

In accordance with your instructions I have audited the books and records of the Town of Coleman for the year ending 31st December, 1937, and besides completing the printed report form required by the Department of Municipal Affairs for Alberta, I have prepared the following statements for your information from the records of the Town:—

1. Cash Statement for year 1937.
2. Revenue Statement for year 1937.
3. Balance Sheet as at 31st December, 1937.

The Cash Statement deals only with actual cash received and disbursed by the Town during the calendar year, regardless of whether the items related to the actual business for 1937, and the Revenue Statement shows only the revenue and expenses applicable to the operation of the Town Affairs for the year 1937, regardless of whether such revenue was received before the books were closed for 1937 or the expenses actually paid in cash by 31st December, 1937. This Revenue Statement treats the Town Tax Levy as being ultimately received in full less the discounts allowed for prompt payment and taxes actually cancelled. You will see that these two statements show that while the Town closed the year 1937 with a cash balance of \$2,060.19, the actual Surplus for the year's operations, after making proper provision for Depreciation, of Fixed Assets, was \$680.56.

You will see that the Taxes collected for Town Purposes during 1937 were actually \$220.10 more than the taxes received in 1936 and were only \$384.59 short of the actual total of the 1937 Town Tax Levy, and after allowing for the \$790.25 of Taxes cancelled, the 1937 Tax Receipts actually exceeded the Tax Levy by \$405.66. Similarly the Taxes Collected for the Provincial Government by the Town totalled \$764.38, compared to the actual levy of \$749.45.

During the year a further sum of \$4,243.94 was expended in cash for additional paving of sidewalks and streets, making a total of \$35,067.67 now invested in cement and asphalt walks and hard-surfaced and graded streets. The total now invested by the Town in Fixed Capital Assets is \$56,953.82, against which is a Depreciation Reserve Account amounting to \$42,288.39, or 74.25%, which is a very satisfactory condition.

The Accounts Receivable comprise \$55.30 advanced on account of the "McKay Property" and \$25.00 advanced on account of the "Hadfield Property."

I beg to report that I visited your office five times during the past year and that on each occasion I found the work up to date, the records in balance and the cash properly accounted for.

Subject to the foregoing, I certify that, in my opinion, the attached Balance Sheet is properly drawn up to disclose a true and correct view of the affairs of the Town of Coleman as at 31st December, 1937, according to the best of my information, the explanations given to me, and as shown by the books of the Town at Coleman, Alberta.

E. D. BATTRUM,
Auditor.

When The Great Queen Died

Nellie McClung Describes the Sorrow in Canada Thirty-Seven Years Ago When Queen Victoria's Death Was Announced

By Nellie L. McClung
(Copyright reserved)

Thirty-seven years ago today the wind was driving the snow down the front street of Manitoba, and a low, sullen sky, threatening more snow, hung over the little town. Horses, hitched to sleighs, stamped impatiently, as the cold settled down on them, and the women in the stores, waiting for the men to conclude their business, saw the short winter afternoon fading into night and anxiously wished to be on their homeward way. Few people were abroad, for the day was bitter.

Suddenly the news broke! Thomas Atkinson, the C.P.R. operator, took the message from the wires that sang frostily in the cold air. Mr. Atkinson had been listening to the talking wires and knew that sorrow was brewing. Four days before he had heard that all was not well at Osborne House. But there was no magic air channels then to carry the news to the men on the roads or the women in the farm houses, and so the blow fell in country places with tragic suddenness.

Mr. Atkinson swung around in his swivel chair and dispatched a messenger to the fire hall, the school, and the Presbyterian church. Then he walked out into the small waiting room and made the announcement to the few people who were gathered around the barrel-stove. Instinctively he removed their hats!

In ten minutes the bells began to ring, hurriedly, noisily, the rusty notes jangling each other in their discordant passage: Andy Martin pulling the rope at the fire hall, John Logan at the school. But when the news reached the Presbyterian church, August Heneberg, with true Presbyterian thoroughness, knew what to do. August knew that tidings of sorrow were not expressed with a loud jangling of bells. So from the church steeple came a measured tolling, solemn, dignified, inexorable, and soon the other bells steadied and grew calm.

The street filled with people. The roads leading into Manitow were dotted with sleighs. Chores or no chores, the people came in to see if it were really true!

When Blake Hewlett, late of Iowa, came in, he went at once to the Farmers' Store, dropping his horse's halter shanks to make them believe they were tied. Mr. Robinson, the proprietor, stood just inside the door, talking to a group of customers.

"What is all the excitement?" Mr. Hewlett asked.

Mr. Robinson's voice was solemn and deep. "Queen Victoria is dead," he said.

"The Queen is dead!" Mr. Hewlett repeated. "So that's why the bells were ringing. I thought something was wrong!"

Mr. Hewlett's listeners might not have noticed his words, or seen anything objectionable in them, but unfortunately for Mr. Hewlett, there was in the group in the Farmers' Store at that moment Mrs. John Farnicombe, whose mother had been one of Queen Victoria's ladies-in-waiting. Mrs. Farnicombe still had the bonnet given by Her Majesty to her mother.

In telling of the incident, Mrs. Farnicombe said her blood seemed to turn to water as she heard what he said; her head swam; her knees grew weak. She could not believe her ears. He thought something was wrong. Indeed! And the terrible man was gone before she rallied. Gone, like Jesus, Mrs. Farnicombe said. Gone into the night. Oh, how she wished she had withered him with a look!

Mrs. Farnicombe, torn with indignation, told the story to groups of people in the store and on the street, and at last made her way to see her friend Mrs. Beaven, who lived in a little white house near the Presbyterian church. Mrs. Beaven was everybody's friend, a sweet-faced old lady with white hair and young brown eyes. It was believed that she belonged to one of the titled families of England and had been disinherited because she had eloped with her father's

coachman. But as she and her husband had never become confidential with the neighbors on this point, the matters was not definitely known. If she ever regretted her choice and longed for the marble halls she had left, she gave no sign, but continued to live happily and serenely in her little white house with its garden of old-fashioned flowers. From her we heard many beautiful stories of the Royal Family; their kindness and courtesy, their consideration for other people. Once she showed me a photograph of the Queen signed in her own handwriting.

When the news of the Queen's death was borne out across the fields in the rusty note of the bells, as I recall it now it fell upon our hearts with a stab of personal bereavement. She was more than a ruler to us. She was a legend, a tradition, a shadowy figure, the embodiment of maternal affection, goodness and piety. My mother had seen her once, when she came to Dundee—and had been "near enough to touch her mantle." As a child I firmly believed that the Queen, in heregenerality, had given us the 24th day of May for our holiday at considerable inconvenience to herself, and that we must ever keep it in respectful remembrance.

On that dark January day, when the bells were tolling for her, I had a great desire to pass on my love for her to my children, so I took Jack, my eldest boy, out with me. I wanted him to see the people thronging the

streets. I wanted him to remember their sad faces and the solemn notes of the bells. I told him she was called Victoria the Good. He was less than four years old, but he still remembers the dull day, the women in tears, the bells.

On our way home we went in to see Mrs. Beaven. I told him the Queen had been as sweet and kind and lovely as Mrs. Beaven, with silvery hair and soft white hands, covered with rings, and that she loved all children, and animals, and with her own hands made warm dresses for poor children.

Mrs. Farnicombe came in while we were there, hot with rage and anger because of the dreadful man who had made light of the death of the Queen. She related the conversation, dramatically.

"He said it, Mrs. Beaven," she cried, almost tearfully. "I thought there was something wrong," were his very words, as if the death of our Queen were not the greatest calamity that we could suffer—a wretched, ignorant foreigner, my dear, without hope or God in the world—with no reverence, no sanctities, and he would dare to speak of her thus, lying cold in death!" "Hush, dear," said Mrs. Beaven soothingly. "You are overwrought. My daughter will serve us a cup of tea. A cup of tea is always a comfort. Do not be so sure that Mr. Hewlett meant any disrespect. The Queen would be the first one to defend him. She even defended the boy who pointed

ANY DAY A FISH DAY

WORLD HAPPENINGS
BRIEFLY TOLD

Trappers in southern and central Alberta are having a "poor year," it was reported by the Alberta game branch. Lack of snow was blamed.

A new motor road from Hamburg to the Danish frontier, as planned, involves the boring of a tunnel more than a mile in length and 100 feet wide under the Kiel Canal.

Excavators at Calford found a jar filled with gold coins worth, by weight \$200 (\$1,000). The coins bore the head of Charles I. or James I. and a Latin inscription.

Export of arms, ammunition and implements of war to the value of \$42,430 was licensed under 18 government permits during December, according to a statement at Ottawa by Revenue Minister J. L. Halsey.

Emil Wooley of Tillamook, Ore., figured his horse had outlived its usefulness, so he sold it for \$250. Wooley's brother-in-law figured he needed a horse, so he bought one for \$50—the same horse.

An armalmet letter mailed in Wellington, N.Z., December 31 and addressed to W. A. Brown of Peterborough, Ont., arrived there Jan. 10. The 8,000-mile trip was completed in eight days.

Sir Charles G. D. Roberts, author of more than 60 volumes of poetry, fiction and history, celebrated his 78th birthday, Jan. 10. A native of Douglas, N.B., Sir Charles has been a resident of Toronto for the last 12 years.

Manitoba district council of the Brotherhood of Railway Employees urged immediate enactment of Dominion legislation that would require all employers to grant employees at least two weeks' holidays annually with pay.

Lord Tweedsmuir, governor-general of Canada, will respond to a unique toast at a University of Toronto banquet, March 8. The toast will be to the memory of a dead man, Lord Durham, who came to Canada 160 years ago and whose role in the rebellions of 1837 was one of the foundations of Canada's constitution.

VERSATILE AND GAY—
THIS JUMPER THAT CON-
TAINS ITS BLOUSE

By Anne Adams

Have you ever seen as appealing a middle-style as this unusual Anne Adams design? Every little girl will love a jumper-sock for school or play and adore this type of dress that may boast more than one blouse change. It's a wise mother who chooses Pattern 4493, for this model is so easy to run up, that you'll have each simple seam stitched in only a short time. Any "little lady" will approve of the captivating finishing touches—bright buttons down the front, trim shoulder bands, Peter Pan collar, and puffed-up sleeves. Nice in cotton crash, with blousey plique.

Pattern 4493 is available in children's sizes 2, 4, 6, 8 and 10. Size 6 jumper takes 1½ yards 36 inch fabric and blouse 1½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly size, name, address and style number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Thirty-nine traffic lights do the work of 13 policemen in the new plan to control traffic in Piccadilly Circus in London.

ELIN FLON

"The Story of Its Finding and Position To-day"

By PRATT RUHN

Here are the pictures we should have given you last week to complete the story.

The incline here was terrific, an unnatural climb for untrained legs, but finally I got to the top and found that the belts leveled off at sorting tables where a dozen men were working.

Sprays of water dashed over the ore as the belts moved through and these expert sorters pulled off on an average 150 tons a day of material classed as waste, dropping it down through the side of the building and into waiting dump cars.

After this the belt carried the remainder to other crushers that reduced the whole to ¾-inch diameter, then to ball crushers that made it into a paste, aided by plenty of water.

From here on it was water and chemicals that did the trick. The ore was first treated in vats with chemicals that bubbled the water and floated off the zinc. Then other treatments to float off the copper and then finally the finest of the balance was treated with cyanide for gold.

However, the copper concentrates as they were called when the water was drained out of them, went on other belts to storage bins from which they were drawn as needed by the smelters which never close down, night or day.

The zinc was extracted from the concentrates by the electrolytic process which consists of floating them through wooden vats in which are suspended thin sheets of aluminum. Electric current causes the zinc to adhere to the aluminum on both sides, and at least 30 men were at work steadily pulling up the sheets stripping the zinc, which is about ¼-inch thick, by use of a short broad faced crowbar and piling on trucks to take to the furnace where it is melted into slabs about 30 to 40 pounds in weight, ready for shipment.

Before entering the zinc department I noted the building was open to the air on all sides and that everybody wore face masks over nose and mouth. I didn't know why till I stepped in and then, zowie! I breathed caught, and how I coughed. I didn't stay long, even with the protection of a handkerchief, but was told afterwards that the sensation was caused by particles in flotation, not dangerous to health but unpleasant, and I agreed with the latter statement though the workers did not seem to mind.

The copper concentrates I followed to the top of the smelter which is just like a furnace eight stories high. You'll remember I said the ore contained sulphur. Well, when I got to the top, what between heat and sulphur fumes, I almost fell down.

Aided by air driven in (oxygen and nitrogen) this sulphur, does all its own burning of the rock. Yes, that's right. You can start a furnace with some paper and a little wood and let air and the ore catches fire and burns itself. On each of the eight levels there are big metal fingers suspended from bars and travelling slowly round and round in the flaming ore, gradually pushing it towards holes in the centre of the furnace, where it drops to the next level. Here the same process except the bars push it towards holes on the outside of the floor and so on to the bottom where, with most impurities, the ore goes to the final crucible.

Here is heat that staggers you. Furnaces fed with powdered coal under high draft, so much ore, so much sand (as a flux) showers of sparks and more heat. Finally its just right, the plug is cracked in the bottom of the furnace, the molten metal is drawn off in crucibles suspended from motor driven apparatus on rails near the ceiling, and swung over to pour into moulds.

The resultant bricks are shipped to Montreal, Que., where a final process takes out any gold or silver. A remoulding of the copper is made, at which time it is practically 100% pure.

This is a quick and sketchy trip through a mine, a mill and a smelter, but its quite a grind to do it on foot, and my leg muscles ached for three or four days from the steep climb.

An outstanding thing above ground also was the small amount of labor required to do an immense amount of work.

Of course, where water was being filtered out of concentrates in big bays you'd find men contriving the operations, and everywhere necessary like the zinc plant, smelters, foundry, etc., but the automatic machinery is marvellous and almost human in its perfection. An immense amount of water is used in the process, either adding water or filtering it away as the processes proceed.

Finally when we've got all they can out of the ore the residue is driven, by water again, through big wheels and pipes, away in the distance a mile or so where it is gradually filling up an abandoned lake.

Making It Double

An undergraduate was hard up, so he wrote his father asking for a remittance of \$20. Knowing his father's tardiness at reply to this kind of a request, the young man added this postscript: "Remember he gives double when you give quickly." His father wired him \$10.

A young man, asked if he favored higher education for women, said: "No, if they are pretty, it's unnecessary, and if they are not, it's inadequate."

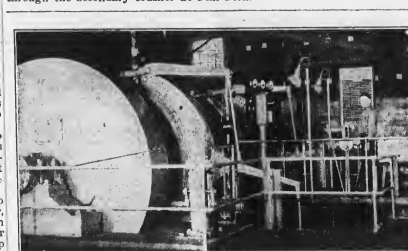

Ore at Flin Flon as it comes from the first crusher. Note the electric magnet suspended over the travelling belt to remove pieces of iron, etc. This ore is on its way to the Symons crusher.

As the ore travels over the sorting tables at Flin Flon, sprays of water clean it and these experts throw out rock which carries no value.

These big rubber travelling belts are conveying ore that has been through the secondary crusher at Flin Flon.

An idea of the tremendous brakes necessary to control the mine elevators. Note size of man on platform.

Kept Queen Bees Alive

About 2,500 Drones Sacrificed Lives On Voyage To Australia

To keep alive 20 or 30 queen bees on the steamer Oracles, which arrived at Sydney, Australia, from London, 2,500 drones killed themselves.

The queen bees were imported from Italy for Australian beekeepers. Each queen was worth \$8. They travelled in an air-conditioned cabin. Only seven died on the voyage. The gallant drones sacrificed themselves by fanning and feeding the queen bees.

The 23 lives queens were put under an anaesthetic and carefully examined under a microscope by Department of Agriculture officials before landing.

Although more than 20 feet long, the Stegosaurus had only a 2½-ounce brain.

Will Be Reconstructed

London's Famous Long Bar In Use For Forty Years

A bar which has been the meeting place for nearly 40 years of Britons returning from all parts of the Empire and the world, the Long Bar at the Trocadero had the final "Tune, gentlemen, please," called on a recent night. Immediately afterwards the equipment was cleared away and the work of dismantling and reconstruction begun.

Opened in 1901, the Long Bar became the progenitor of a series of bars with the same name in many parts of the world. Men home from abroad went there and consulted the "oversea book," in which thousands of planters, traders, officials, and others had written their addresses abroad and their British addresses in order that they could be traced by friends.

The ultra-violet light of the sun varies in intensity as much as 20 per cent.

SUNDAY SCHOOL LESSON

JANUARY 23

MINISTERING TO PHYSICAL NEEDS

Golden text: And he healed many that were sick. Mark 1:34.
Lesson: Mark 1:29-45.
Devotional reading: Isaiah 61:1-6.

Explanations And Comments

The Healing of Peter's Mother-in-Law, Mark 1:29-31. Mark begins his story of the ministry of Jesus with a record of what happened on a single day. Last week we had the earlier events, the preaching in the synagogue and the restoring of an epileptic; to-day we are to consider the other events on that busy day—typical, no doubt, of most of Jesus' days. From the synagogue Jesus and his four disciples went to the home of Peter and Andrew. There Jesus was informed that Peter's mother-in-law was ill with a fever.

Jesus took her by the hand and raised her up, and the fever left her. His touch here, however, "His grasp meant sympathy, tenderness, identification of himself with humanity, the communion in upholding, restoring strength. It is a picture of the very heart of the Gospel."

An Evening Spent in Physical Healing, Mark 1:32-34. When the sun had set the Sabbath was over, and it was then permissible for the people to go where they would; they flocked to Jesus with their sick. "All the sick and the demon-possessed he healed. The adjective divers used with diseases means diverse, different."

A Brief Period for Prayer, Mark 1:35-38. Despite the strain of the day, a long time before dawn the next morning Jesus had left the house and sought a lonely place away from the city where in solitude he could commune with God. "There is every reason to believe that prayer was Jesus' normal habit, and that it was from this practice that he derived his strength. And special occasions demanded special measures. As the physical frame is restored in rest and sleep, the spiritual being of Jesus found its life in communion with his Father. Prayer was his rest, as it is the rest of all who are really in touch with God. Worn by the effects of the last day, he need spiritual recuperation and peace. Situated as he was, solitude was essential to rest prayer, and solitude was only to be attained by him far from the dwellings of men. Prayer to Jesus was essentially communion. Immediate intercourse between himself and God. He was tired, exhausted, so he prayed, and in his prayer he found that rest and strength which he needed for the continuance of his work" (Theodore T. Robinson).

Interesting Find

Discovery Skull Of Prehistoric Man In Cairo, Egypt

Discovery of the skull of a prehistoric man, believed to date back 8,000 years, in the Fayum Desert 77 miles from Cairo, has aroused interest of archaeologists.

The skull was found by C. Townend, a geologist of the Cairo branch of a British bank. The Fayum depression is considered the cradle of one of the world's earliest civilizations.

Two British women, Miss Canon Thompson and Miss E. W. Gardner, in 1924-25 found near Lake Moeris other traces of a race of pastoral-agricultural people, possessed of a fully-evolved Neolithic culture, who are believed to have lived nearly 8,000 years ago.

Townend stumbled across the Negro skull of a strange prehistoric man. The two central incisor teeth of the skull are missing and a wisdom tooth was also missing. The skull is very small and is that of a man possessing poorly developed mental faculties.

Chinese Children Head Class

Four In One Family Stand Highest In Ontario School

Principal J. F. Harvey, who presented diplomas to the graduating class of the High School at Lakeshore, Ont., mentioned that the graduating was not so large as usual, but he said, "the quality is every bit as good."

"The school holds a unique record," Mr. Harvey continued, "for four students from one family stand first in four forms of the school—Ross Wong stood highest in First Form, Lily Wong stood highest in Second Form, Mary Wong stood highest in Third Form, and George Wong stood highest in Fourth Form. We are exceptionally proud of these children; their average was well over 90 per cent. in all subjects. Sometimes I think that a school composed of the type of student such as the Wong children would be the teachers' Utopia."

The North Star, being in a continuation of the line of the earth's axis, appears as a pivot around which all the rest of the stars revolve every 24 hours.

A wild deer seldom dares to attack man, but a tame deer sometimes attacks furiously.

Damage done by insects nullifies the work of a million men annually.

ARTICLE No. 24

Cancer Of The Skin

Cancer of the skin is of many varieties and is very common, particularly in fair white races. The commonest skin cancers are rodent ulcers and epitheliomas. They occur on exposed parts of the body and among the factors which play an important part in their causation and prevention are the actinic or chemically active rays of sunlight and pigmentation of the skin. Despite the fact that dark-skinned people occupy as a rule the hottest regions, where the effects of sunlight are most severe and long-continued, the sun's action upon them is comparatively light. The melanin, the pigment of the skin, stands as a sentinel guarding the underlying tissues from the baneful effects of sunlight.

The backs of the hands and the face suffer most from the skin cancers. It is remarkable that these cancers, plain to view, are often allowed to progress without treatment until the condition is hopeless. This is because the public have not yet learned to distinguish the early signs of cancer.

How Can Cancers Of The Skin Be Recognized?

1. Rodent Ulcer. This type generally affects the central horizontal third of the face, that is, the area bounded below by a line drawn just beneath the nose to the lobule of the ear and limited above by the line of the eyebrows. A large number of cases arise from the inner and outer angles of the eyes and the groove between nose and face. Rodent ulcer begins as a small nodule with a shiny appearance sometimes having small veins on the surface. The growth slowly enlarges, breaks down in the centre and ulcerates. Rodent ulcers do not spread to other parts of the body. The person goes on trailing it with salve from the druggist or some quack remedy until it becomes incurable.

2. The Epitheliomas are a somewhat rapidly-growing malignant disease of the skin, prone to spread to other parts of the body. This form of cancer is commoner in the aged than in those of younger years, and is rather more frequent in men than in women because men are more exposed to injury and to the weather. The predominate sites are those exposed to strong sunlight that is the ears, face, neck, hands and forearms. An epithelioma frequently arises in the centre of the nose, the nose is dome-shaped with a surface like the skin. Taken in the early stage both rodent ulcers and epitheliomas are quite curable. Neglected they are sure causes of death.

Tests Are Interesting

Show Altitude Pressure Effects On The Boiling Of Eggs

A three-minute egg is anything but that when cooked in an airplane. Tests conducted by Pan American Airways in the center of the stratosphere, that of a three-minute egg is a three and a half-minute egg when cooked at 5,000 feet altitude and at 12,000 feet it is a four and a half-minute egg. The tests were conducted to determine altitude pressure effects on the boiling of eggs.

And The Church Moved

It is reported that in the Sudbury district—a religious broadcast—will be taken off so that an American comedian can be heard. In Texas some years ago there was a law forbidding the erection of a saloon within 200 yards of a church. When it was discovered that less than this distance separated a church from a saloon the Mayor gave the congregation a week to move the church.—Toronto Globe and Mail.

REMINGTON PORTABLE TYPEWRITERS

Ribbons, Carbon Paper, etc., on sale at The Journal office

Local News

The Ladies' Aid of St. Paul's United church will hold their St. Valentine Tea, parcel and apron sale on Saturday, February 19, from 3 till 6 p.m. Keep this date open.

Harry Gardner, energetic president of Coleman Canadians, is on the job again after being off for a few days with a severe cold.

Good stationery adds prestige to your business. Good stock and good workmanship are prime essentials, and you are assured of satisfaction by The Journal's experienced printers.

The Journal can supply any make of typewriter, Remington or Underwood, on short notice. Remington Junior portables sell at \$45 on monthly payments; other models \$60, \$75 and the Noisless at \$85. Standard typewriters at higher prices.

Brubaker in the New Yorker: The Japanese have now succeeded in enlisting all citizens in their national enterprise. Those who do not care for the war are working overtime in the gigantic Department of Apology and Redress.

Mr. and Mrs. James Ford left on Sunday for High River, where Mr. Ford will spend part of his three months leave from his duties as secretary of the town council and the school board. They will be the guests of Mr. and Mrs. A. L. Watkins at High River.

The hockey game on Monday resembled somewhat the old-time games, feeling running so high that the police were on guard over the Maple Leafs after they quit playing, with about seven minutes to go, in the third period, with the score 4-2 for Canadians.

F. T. Edwards, publisher of The Echo, Pincher Creek, was one of the contingent of 35 who booked reserved seats at the Lethbridge-Canadians hockey match on Monday evening. Editor Bartlett of Blairmore was among the interested spectators. Dick Matthews, sports editor of The Lethbridge Herald, came up with the Maple Leafs.

NAZARENE MISSION

Sunday services: 11 a.m. and evangelistic service at 7:30 p.m. Sunday school at 1 p.m. Weekdays: Tuesday at 7:30 p.m., prayer, praise and testimony. Friday at 7:30 p.m., Gospel service.

Miss Berglund will be in charge of the service tonight, also the Sunday services, in the absence of Miss Moosman, who is taking charge of the Nazarene church services in Lethbridge. The public is cordially invited to attend all these services.

TOWN COUNCIL HELD

REGULAR MEETING

Routine and Relief Applications Dealt With—Petition from West Coleman re Water Drainage

A regular meeting of the council was held on January 13, present being Deputy Mayor Borrows, Councillors Allan, Antrobus, Chapman, Haysom and Plante.

The auditor's report for 1937 was accepted and ordered filed, and that same be published in The Journal.

E. D. Battum's application for re-appointment as auditor was laid on the table to be dealt with by the incoming council.

The secretary made a report on a few properties in town which are in arrears of taxes.

A petition re water drainage was received from residents of Block D in West Coleman. The Works and

Property committee will deal with it. Several relief applications were brought to the attention of the council and are being acted on. Accounts passed for groceries and supplies for indigents from various stores totalled \$307.20.

The following accounts were also passed:

Charles Makin, \$1.25; The Coleman Journal, \$35.88; Joseph Landis, \$2.00; Fred Tewska, \$28.92; Coleman Light and Water Co., \$243.80; The Coleman Hardware Co., \$2.80; Both Memorial Home, \$12.00; Provincial Treasurer, \$25.00; E. D. Battum, \$43.90; McGillivray Creek Coal Co., \$28.30.

MINEIVA CHAPTER, O.E.S. INSTALLATION OF OFFICERS

Mrs. H. E. Gate Will Head Chapter as Worthy Matron in 1938

On Thursday evening, January 13, the annual installation was conducted by Mrs. Albert F. St. John, installing officer; Mrs. H. Garner, marshal; Mrs. A. W. H. McLeod, chaplain; Mrs. S. G. Bannan, organist, and Mrs. Halliwell, warden. Officers installed were:

Worthy Matron Mrs. H. E. Gate
Worthy Patron Mrs. J. Emmerson
Assoc. Matron Mrs. MacGregor
officer Mrs. M. B. Thomas
Treasurer Mrs. Mary Dewar
Conductress Mrs. I. Walker
Assoc. Conductress Mrs. Hilda Haman
Marshal Mrs. Elizabeth Cox
Adah Mrs. Elizabeth Short
Ruth Mrs. M. Pattinson
Eather Mrs. W. L. Rippen
Martha Mrs. Emily Short
Electa Mrs. Janet Cooke
Warder Mrs. C. Garner
Sentinel Mrs. H. T. Halliwell

A carnation boutonhole was presented to each officer and a beautiful bouquet of carnations to the installing officer, marshal, and pianist. A pleasant evening was brought to a close by refreshments being served by Mrs. Walker, Mrs. Cooke, Mrs. Cox and Mrs. Shields.

When The Great Queen Died

(Continued from Page 5)

a pistol at her, and the demented man who struck her on the head and crushed a lovely bonnet. When they were ordered to be flogged, it was the Queen herself who saved them from this punishment. She won respect by being worthy of it, my dear, not by demanding it."

I was glad of this conversation, for I could see it was being eagerly listened to by my little four-year-old. Before we left, Mrs. Deaver had an explanation to cover Mr. Hewlett's words—an explanation which even Mrs. Farncombe had to accept.

"I think you have misjudged Mr. Hewlett," she said to her friend, "without meaning to do so. You have given his words a meaning he did not intend. You were under the strain of deep emotion and read into his words a meaning of your own. You have put the emphasis on the wrong word. Are you sure he did not say 'I thought there was something wrong!' meaning I knew there was something wrong. That, my dear Mrs. Farncombe, would make his words entirely innocent, and that is what I prefer to believe. That is what Her Majesty would wish us to believe, and I think it would be wise, and kind, to say no more about it."

So spoke Victoria's contemporary and friend, thirty-seven years ago today. Words, kind, gracious words, have an immortality of their own!

MOST HEAVILY TAXED

The cumulative taxation on the oil industry, the most heavily taxed of all the great industries, has reached the stage where it has affected the ability of some units, particularly the independents, to expand their operations, and to meet the increasing demand for petroleum products.

There is a tax, sometimes two or more, on every phase of their business, on what they sell, and on everything they buy. What they buy costs more because of increased taxation on businesses which supply the oil industry.

As an example take the case of Texas. Instead of oil being taxed 2% per cent of its sale value, as popularly supposed, the average barrel of oil produced in the State carries a direct tax load of 8.5 cents. In 45 counties the average state and county tax is 10.9 cents and in 20 counties it ranges from 11 to 14.7 cents a barrel. This is because of the system of multiple taxes levied by the state, counties, school districts, and other subdivisions. More than a dozen different kinds of taxes are levied on the production of oil.

Gasoline is being retailed in Texas today for the same price as 15 years ago when crude was \$2.50 a barrel. The producer is now getting 50 per cent less for his crude but taxes eat up the difference.

The oil industry has carried the increased cost of labor, which was al-
